# Summary

This report summarises the events that were organised or co-organised by the European project Path2Integrity in 2019. These events served two main purposes: (1) to review the project's outputs and discuss how to proceed and (2) to establish contacts with all stakeholder groups. The 2019 calendar year coincides with the project's collection and analysis phase. Path2Integrity is funded by the European Union's Horizon 2020 research and innovation programme.

**Mini-conference, Brussels, 30 October 2019**

## What is the Path2Integrity project?

Path2Integrity is a three-year project of eight partners from five European countries that fosters research integrity in secondary schools, universities and in the administration as well as among policy makers through a two-component approach of formal and informal learning. In other words, Path2Integrity is transdisciplinary and it targets everyone directly or indirectly involved in education and research, regardless of social or cultural background.

To stimulate formal learning, a Path2Integrity handbook of instructions is being developed. At its core, the handbook will contain at least 20 learning cards, which are already being tested by the project partners and beyond. Furthermore, the Path2Integrity roadmap presents in an appealing way a collection of educational material to teach research integrity and research ethics. In order to promote informal learning, a Path2Integrity campaign is being created. The campaign will present role-models and facts about research integrity to raise awareness for research integrity and the virtues for which it stands. This two-component approach is accompanied by a thorough evaluation of the results.

The Path2Integrity project is structured into four phases: (1) Collection and analysis, (2) Development, (3) Implementation and dissemination and (4) Effectivity. During the 2019 calendar year, which coincides with the collection and analysis phase, the status-quo of teaching research integrity is assessed.

## Path2Integrity events in 2019

Four events were scheduled to take place during the first project year according to the grant agreement. These are listed in Table 1.

**Table 1: Path2Integrity events according to grant agreement**

| Meeting No. | Meeting | Title | Leading beneficiary | Project month |
|---|---|---|---|---|
| 1 | Kick-off meeting | Learning environments for research integrity | Coburg University | 2 |
| 2 | Mini-conference | (WP3) interdisciplinary meetings | EUREC Office | 6 |
| 3 | Meeting | WP3 interdisciplinary meetings | Kiel University | 8 |
| 4 | WP3 workshop | Dialogical competencies in learning research integrity | Coburg University | 11 |

Due to substantial changes in the project staff, the kick-off meeting was held already in the first project month in order to update all the partners. At the kick-off meeting the partners agreed to combine the mini-conference planned by the EUREC Office (initially scheduled to take place in project month 6) with the final conference of the ENERI project (project month 10) and to bring forward the meeting organised by Kiel University to project month 7. These changes are reflected in Table 2. The table also contains one additional meeting, which was held in Madrid in project month 11.

**Table 2: Path2Integrity events in 2019**

| Meeting No. | Meeting | Title | Leading beneficiary, place | Participants | Project month |
|---|---|---|---|---|---|
| 1 | Kick-off meeting | Learning environments for research integrity | Coburg University, Coburg | Consortium, advisory board | 1 |
| 2 | Symposium | Perception of research integrity and the (cross-)disciplinarity of teaching ethical cases | Kiel University, Kiel | Consortium, stakeholder focus group: secondary school students | 7 |
| 3 | Mini-conference (after the ENERI final conference) | Mini-conference on teaching research integrity | EUREC Office, Brussels | Consortium, advisory board, stakeholder focus group: members of research ethics committees, research integrity offices | 10 |
| 4 | WP3 workshop (embedded in the Symposium on scientific practice) | Path2Integrity – Learning how to argue for good research practice | Coburg University, Coburg | Consortium, stakeholder focus group: educators | 11 |
| 5 | Congress | The Fourth Industrial Revolution and its Impact on Ethics – Solving the Challenges of the Agenda 2030 | 3C Compliance, Madrid | Consortium, advisory board, stakeholder focus group: policy makers | 11 |

The exchange with Path2Integrity's stakeholders is of paramount importance, especially during the project's early phase. Therefore, Table 2 also lists which target groups' representatives participated in the meetings.

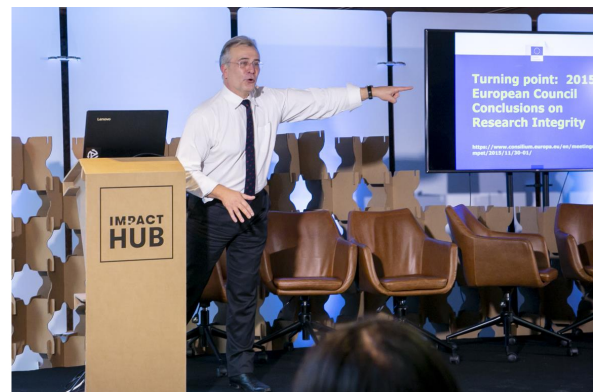

**Symposium on scientific practice, Coburg, 11 and 12 November 2019**
